Re: Application of WPX Energy Production, LLC for administrative approval of a non-standard 160-acre spacing unit in the Basin-Mancos Gas Pool; approval of a non-standard location in the Basin-Mancos Gas Pool (97232); approval of a non-standard location in the Lybrook Gallup Pool (42289); and approval to downhole commingle production from the Lybrook Gallup Pool (42289) and the Basin Mancos Gas Pool (97232), Rio Arriba and San Juan Counties, New Mexico.

Dear Mr. Catanach:

WPX Energy Production, LLC (OGRID 120782) is the lessee of two federal leases (NMNM 109397 and NMNM 109397) and one allotted lease (NOG 1312-1850) covering the N/2 N/2 of Section 1, Township 23 North, Range 8 West, NMPM, San Juan County, New Mexico, and the N/2 NW/4 of Section 6, Township 23 North, Range 7 West, Rio NMPM, Rio Arriba County. WPX plans to drill the **Chaco 2307-06G No. 161H Well** as a horizontal well penetrating the N/2 N/2 of Section 1, Township 23 North, Range 8 West, NMPM, San Juan County, New Mexico, and the N/2 NW/4 of Section 6, Township 23 North, Range 7 West, Rio NMPM, Rio Arriba County. This acreage will be subject to a communitization agreement. The **Chaco 2307-06G No. 161H Well** will be drilled from a surface location 1646 feet from the North line, 2317 feet from the East line (Unit B) of Section 6. The completed interval will begin at approximately 1066 feet from the North line, 2265 feet from the West line (Lot 3) of Section 6, and the last perforation will be no closer than 483 feet from the North line, 390 feet from the West line (Lot 4) of Section 1.

The N/2 N/2 of Section 1 is located in the Basin-Mancos Gas Pool (97232) and subject to the special rules for that pool created under Order R-12984. The N/2 NW/4 of Section 6 is located in the Lybrook Gallup Pool (42289), an oil pool that is not listed in paragraphs (3) and (4) of Order R-12984. The Lybrook Gallup Pool (42289) is subject to 40-acre spacing and 330 foot setbacks per Statewide Rule 19.15.15.9 NMAC. As a result of this acreage configuration, WPX's proposed development plan requires the following relief:

A. Approval of a 160-acre non-standard spacing and proration unit in the Basin Mancos Gas Pool. Pursuant to NMAC 19.15.15.11(B)(2), WPX seeks approval of a non-standard 160-acre spacing and proration unit in the Basin Mancos Gas Pool, comprised of the N/2 N/2 of Section 1. Approval of a non-standard spacing and proration unit in the Basin Mancos Gas Pool will allow WPX to equitably allocate production between the two pools.

B. Approval of a non-standard location in the Basin Mancos Gas Pool (97232). The portion of the completed interval within the N/2 N/2 of Section 1 will be in the Basin Mancos Gas Pool. The portion of the wellbore within the Basin Mancos Gas Pool is non-standard because it will be located closer than 660 feet from the outer boundary of the proposed spacing unit and will therefore encroach on the spacing units to the North, the Northwest, the West, the South, and the Southwest. The spacing units to the North, the Northwest, the West, the South, and the Southwest are located in the Basin Mancos which requires 320-acre spacing. Approval of the unorthodox completed interval pursuant to NMAC 19.15.15.11(B)(2) will allow for efficient spacing of horizontal wells and thereby prevent waste.

C. Approval of a non-standard location in the Lybrook Gallup Pool (42289). The portion of the completed interval located in the N/2 NW/4 of Section 6 will be in the Lybrook Gallup Pool. The portion of the wellbore within the Lybrook Gallup Pool is non-standard because it is located closer than 330 feet from the outer boundary of the proposed spacing unit and therefore encroaches on the spacing units to the South and Southeast. See Statewide Rule 19.15.15.9 NMAC. The spacing units to the South and Southeast are also located within the Lybrook Gallup Oil Pool which requires 40-acre spacing. Approval of the unorthodox completed interval pursuant to NMAC 19.15.15.11(B)(2) will allow for efficient spacing of horizontal wells and thereby prevent waste.

D. Approval to downhole commingle production from the Lybrook Gallup Pool (42289) and the Basin-Mancos Gas Pool (97232). Since the completed interval for the proposed **Chaco 2307-06G No. 161H Well** will produce from the Lybrook Gallup Pool and the Basin-Mancos Gas Pool, commingling approval is required pursuant to NMAC 19.15.12.11.C(1).¹

In support of this application, WPX has included the following exhibits:

Exhibit 1 is a Well Location and Acreage Dedication Plat (Form C-102) showing the proposed well.

¹ By separate application, WPX is seeking authority to surface commingle and off-lease measure production from the **Chaco 2307-06G No. 161H** and the **Chaco 2307-06G No. 274H** wells.

HOLLAND & HART LLP

Exhibit 2 is a land plat of Sections 1 and 6 showing the location of the **Chaco 2307-06G No. 161H Well**, the surrounding sections, and the two pools. The portion of the completed interval within the Basin Mancos Gas Pool encroaches on the 320-acre spacing units to the North, the Northwest, the West, the South, and the Southwest of the proposed project area. The portion of the completed interval located within the Lybrook Gallup Pool encroaches on the 40-acre spacing units to the South and Southeast of the proposed project area. This exhibit also identifies the parties affected by the non-standard location and by the proposed non-standard spacing unit in the Basin Mancos.

Exhibit 3 is a copy of a completed form C-107-A for the request to downhole commingle production from the Basin Mancos Gas Pool and the Lybrook Gallup Pool.

Exhibit 4 is a list of the affected parties for the request for approval of the non-standard well location, the non-standard spacing unit, and the request for downhole commingling. A copy of this application with all attachments has been sent by certified mail to each of these affected parties advising them that if they have an objection they must file it in writing with the division within 20 days from the date the division receives this application. WPX is the 100% working interest owner in the S/2 of Sections 35 and 36, therefore there are no affected parties in the spacing units to the North, Northwest, and South. Since Sections 1 and 6 are comprised of federal and allotted lands, a courtesy copy of this application has been provided to the Bureau of Land Management and the Federal Indian Minerals Office.

Your attention to this matter is appreciated.

Sincerely,

Jordan L. Kessler

Re: Application of WPX Energy Production, LLC for administrative approval of a non-standard 160-acre spacing unit in the Basin-Mancos Gas Pool; approval of a non-standard location in the Basin-Mancos Gas Pool (97232); approval of a non-standard location in the Lybrook Gallup Pool (42289); and approval to downhole commingle production from the Lybrook Gallup Pool (42289) and the Basin Mancos Gas Pool (97232), Rio Arriba and San Juan Counties, New Mexico.

To Whom It May Concern:

Enclosed is a copy of the above-referenced application which was filed with the New Mexico Oil Conservation Division on this date. Any objection to this application must be filed in writing within twenty days from this date with the applicant and the New Mexico Oil Conservation Division, 1220 South St. Francis Drive, Santa Fe, New Mexico, 87505. If no objection is received within this twenty-day period, this application may be approved administratively by the Division.

If you have any questions about this application, please contact the following:

Subject: FW: WPX Chaco 2307-06G Well No. 161H C-102

Hi Heather,

Can you correct this very minor issue on the C-102? It sounds like everything else has been approved (so far) and is awaiting signature Thursday.

Thanks!
Jordan
