Total gas production and sales will be based on the measurement at the CDP and allocated back to each well based on chart readings.  
The DCP's meter #68483 is located at Sec. 31-T23S-R25E.

The estimated production for the Opuntia Draw ATG State Com #1 is 340 MCF per day and 33 MCF per day for the Tyler AVC State #1.

Identical Ownership.

CONTIGUOUS LEASE AREA

The proposed commingling will enhance the accuracy of measurement and is necessary for economic operations for the marginal gas production on the above reference wells, and would extend the economic life of the well.

The proposed commingling will not result in reduced royalty or improper measurement of production.

We understand that the request approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

MUST NOTIFY STATE LAND OFFICE PRIOR TO COMMINGLING.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
