RE: Administrative Order SWD-1378-B
Geronimo 28 State SWD No. 2
API: 30-015-40876
Unit I, Section 28, T17S, R28E
SWD; Wolfcamp – Cisco (96136)
Eddy County, New Mexico

Dear Mr. Goetze:

Please find attached a copy of the subject Order issued by the OCD on June 17, 2013. Though this Order does not restrict our source water, Apache would like to notify the OCD of our intention to dispose water from not only the Glorieta/Yeso (Washington 33 State 6 – 30.015.30138), but also water from the San Andres, Queen, Grayburg (Washington 33 State 15 – 30.015.22822), Bone Spring (Palmillo 14 State 1 – 30.015.39027), and Abo (Empire Abo Unit PH-2 #K018B). Water Analysis are included for the additional formations to satisfy any compatibility concerns.

This SWD well is used only for Apache non-commercial produced water. Scaling issues are not anticipated to be a problem and Apache will continue to monitor injection pressure to ensure compliance.

If you need additional information or have any questions, you may contact Mr. Dean Gaines at 432-818-1803 or email Dean.Gaines@apachecorp.com

Kind Regards,

A handwritten signature in cursive script that reads "Isabel Hudson".

**Isabel Hudson
Regulatory Analyst**

Note 1: When assessing the severity of the scale problem, both the saturation index (SI) and amount of scale must be considered

Note 2: Precipitation of each scale is considered separately. Total scale will be less than the sum of the amounts of the eight (8) scales.

Note 3: Saturation Index predictions on this sheet use pH and alkalinity; %CO₂ is not included in the calculations.

Note 1: When assessing the severity of the scale problem, both the saturation index (SI) and amount of scale must be considered

Note 2: Precipitation of each scale is considered separately. Total scale will be less than the sum of the amounts of the eight (8) scales.

Note 3: Saturation Index predictions on this sheet use pH and alkalinity; %CO₂ is not included in the calculations.

Subject: Corrected Sources - SWD-1503 and SWD-1378-B - Additional Disposal Sources

RE: AAO Federal SWD No. 1 (30-015-42549; SWD-1503) and Geronimo 28 State SWD No. 2 (30-015-40876; SWD-1378-B)

Mr. Gaines:

On behalf of Apache, you have submitted water analysis for additional sources for disposal in the two referenced SWD wells. These sources were not included in the original application for the wells and are from producing wells operated by Apache. The wells with the proposed new sources include the following (corrected):

Geronimo 28 State SWD No. 2

C-108 application sources: Glorieta and Yeso formations

Requested additional sources: San Andres – Queen – Grayburg formations, Abo formation, and Bone Spring formation

AAO Federal SWD No. 1

C-108 application sources: Glorieta and Yeso formations

Requested additional sources: San Andres – Queen – Grayburg formations

Division has reviewed the water analysis for each source and has no objections to the injection of the new sources into the respective well. Copies of the water analysis and Apache's correspondence will be placed in each of the respective administrative order file and well file. Please contact with any additional questions regarding this matter. PRG
