Subject: RE: [EXT] Spill Remediation Proposal - B Hardin Battery (1RP-4933)

Ben Arguijo,

The NMOCD has reviewed the workplan proposal for the B Hardin Battery (**1RP-4933**) incident **NOY1801657371**. The plan is acceptable to the NMOCD with a few comments:

- When the closure plan is submitted please include pictures of the hard rock layer underlying the site.
- In subsequent reports provide depth to water information for the site using data points that are less than 30 years old.

Additionally, the department accepts the forbearance to complete the necessary remediation in the areas directly adjacent to the heater treater and active pipes until the facility is decommissioned.

Closure report is due to Bradford Billings by Monday July 29, 2019.

Note: this determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Regards,

Dylan Rose-Coss

Subject: [EXT] Spill Remediation Proposal - B Hardin Battery (1RP-4933)

All,

Attached please find the "Environmental Site Summary & Spill Remediation Proposal" for the B Hardin Battery release site (1RP-4933). Trinity is prepared to begin the proposed remediation activities upon your review and approval.

A Form C-141 "Remediation Plan Checklist" is also attached.

If you have any questions, please do not hesitate to contact me.

Respectfully,
Ben J. Arguijo
