**Subject:** [EXT] RE: Trove Energy and Water, LLC\_SEC SE Federal SWD No.1 Issues

Baylen,

I'm VERY sorry... we weren't expecting this one either! I know it was on your list and I was just looking at statuses going down that list and did not snap to this one. IT was replaced [in my files] with the Midnight Flyer. I believe this is the last one that was shelved and it was due to Matador essentially telling us they would protest any applications within a certain distance of their acreage.

The ONLY SEC SE prospect to make it through Matador (and/ or XTO) is the #3.

Again, my sincere apologies for the confusion. This one should have been withdrawn also.

Thanks,  
Ben

Ben,

I was reviewing the C-108 for the subject well and I noticed that there were a couple of issues that will need clarification before the review process can be furthered.

- The leaseholders for T26S R32E S19 Unit M and S30 Unit D should be included in the 1 mile AOR but they were not identified or notified in the application
- Can you provide estimated tops for the top/bottom of the salado/salt and the bounding layers for disposal (Mississippian Lime, Woodford, Devonian, Fusselman, Montoya)

If you can provide me with these items I can move forward with drafting an order for final approval.

Kind regards,  
**Baylen Lamkin**
