Subject: [EXT] RE: Inquiry into current applications

Baylen,

Thank you for the email, and I hope all is well in Northern New Mexico. I want to start by saying all of the submitted applications are very important BC&D Operating, and we would not submit applications we do not intend on drilling. Some applications may get protested, and resolutions are sometimes challenging to achieve. We make every effort to achieve resolution outside of the hearing system to limit the resources and time spent by the State of New Mexico. Please see the list of wells below; I have put them in order of priority. Please note we intend to withdraw the Jal Public Library Trust 9-24-35 SWD, and the Federal PP #1 is not a BC&D Operating C-108 application.

1. West Jal Deep SWD #6 (SWD2211)

1,200' FNL & 1,300' FEL Sec 8 T25S R36E

Subject: Inquiry into current applications

Dear Mr. Hill ,

In an effort to maintain focus on applications that operators would like to prioritize in the current market situation the division is reaching out to them to inquire about how you would like to proceed with your current C-108 submissions. I have attached a list of the C-108 applications that the division is currently tracking for BC&D Operating Inc. along with the divisions' comments on status. If you could please indicate/communicate back which applications have become a priority, if there are any that you no longer wish to pursue, or if there are any discrepancies between our records and yours it would greatly help to focus efforts on desired projects. If you have any questions please feel free to reach out.

Kind regards,

Baylen Lamkin
