Attachments: Stamps 8.pdf; Stamps 9.pdf

Dean,

Please see the attached PDF's for the certified tracking numbers of those remaining interest owners. My apologies for accidentally leaving them out.

As for the measurement plan, a gas orifice allocation meter will be installed at the Turner State #3 which will measure the total gas production from both of the Turner State wells, seeing as ownership is identical between the #3 and #4 and thus wouldn't need to be measured individually. The remaining production coming from the A B Reeves #7 will be measured by subtracting the Turner State gas production from the total gas production at the Turner State CRP sales meter.

I hope that the aforementioned measurement plan serves as an appropriate substitute for the one written in the application. My apologies again for the lack of clarity.

Please let me know if I can be of any other assistance. Your inquiries are very much appreciated.

Thank you,

Marshall Bates

Subject: Surface Commingle for Turner State Compression System CRP

Hello Marshall,

I am reviewing the surface commingle application (CTB-962) for the Turner State Compression System CRP operated by FAE II Operating, LLC.

What is the plan for measuring the gas for each of these wells? Will each well have its own allocation method or will subtraction be used for any of them?

What are the certified tracking numbers for the following interest owners?

Mooers Oil Corp.

Norma Jean Talbert

Otis E Ramsey Jr.
Richard W Payne
Roy F Pearce Jr.
Sandra Hess Briscoe
Savannah Hess Altman
Sheryl Lynn Morgan
The Toles Company
The Pettit Family Trust
Triple S Resources
White Living Trust
