Conditions of Approval (if any):

Marathon Oil Permian LLC is requesting approval for off-lease storage and measurement:

Federal Lease NM-0554771

Well Name	Location	API #	Pool
Bootlegger 21 Federal Com 1H	Sec. 16-T20S-R29E	30-015-43970	(27470) Getty; Bone Spring

Lease map shows the pad for the Bootlegger 21 Federal Com 1H resides off-lease from the hydrocarbons produced from the wells. Working interest owners are identical.

The off-lease storage and measurement is in the interest of conservation and waste and will result in the most effective economic means of producing the reserves in place from the affected well and will not result in reduced royalty or improper measurement of production. The BLM and OCD will be notified of any future changes in the CTB.

Oil and Gas Production

The oil and gas production will be measured at the tank battery located in UL. P, Section 16, T20S-R29E. The oil will be stored in the tank battery which has a total of five oil tanks.

Oil, gas, and water volumes from the well will be determined by using individual metering allocation separator.

Please see the enclosed Administrative Application Checklist, C-103 Application for off-lease measurement, plats for referenced wells, site facility diagram, and maps with lease boundaries showing wells and facility locations.
