Dean,

Yes that is correct. The attached NM C-102 you sent is what we show on file for the Middle Mesa Com #3, API #30-045-29633. Thanks MH

Hello Mike,

The pool and lease from which the new well is producing is already approved within PLC-233. As such, only a C-103 and C-102 will be needed to add the additional well to the current order. Is the attached C-102 still correct for 30-045-29633?

Dean,

What form will I need to complete to amend the current surface commingle order PLC-233 or will the attached sundry previously submitted be sufficient. The Middle Mesa Com #3 & Middle Mesa Com #3S are both Fruitland Coal wells produced from the same S/2 dedicated acreage, therefore common ownership. The Middle Mesa #2 as indicated in the approved surface commingle order PLC-233, is produced from the South Los Pinos – Fruitland Sand Pictured Cliffs. Reference, See the attached C-103 and attachments.

Thanks,

Michael T Hanson

Hi Mike,
These look very familiar, but I'm not sure why they aren't in the well file.
I will have to see if they are lost in the system somewhere.

Anyway, this will require either a new surface commingle administrative order or an amendment to the existing one.

I'm not sure which.

I've copied one of our engineering staff who should be able to advise you on this.

In the meantime, I will make sure these get into the well file.

Kate

Katherine,
Have you had a chance to review the NMOCD C-103 for the Middle Mesa Com #3, see attached. I attached the BLM approved copy that was submitted on the BLM sundry. Let me know if you need additional information. Thanks MH.
