Dear Dylan,

On behalf of BAM Permian Operating, LLC, I am requesting a 90-day extension of SWD-2381 approval for their Linley State SWD 1 (30-005-64358; M-32-15s-29e). The SWD approval is currently due to expire July 16, 2021. Disposal will be from 3750' to 4060' in the San Andres and Glorieta.

Due to Covid-19 and last year's widely fluctuating oil prices, BAM had postponed drilling of the Linley State SWD 1 and its adjacent Linley State 1H (30-005-64337; M-32-15s-29e) oil well. BAM now plans to spud Linley State SWD 1 in May 2021. Once that well is completed, BAM will drill and complete the Linley State 1H on the same pad.

This combined dual well effort will take 45-60 days and bring BAM very close to the SWD-2381 expiration date of commencing injection operations by July 16.

BAM Permian Operating, LLC therefore requests a 90-day extension of the expiration date to October 16, 2021. There has been only one substantive well change within a 1/2-mile radius since the original C-108 application. That change is APD approval for BAM's Linley State 1H. See attached page for a list of all existing or approved wells within a 1-mile radius.

Please call me if you have any questions.

Sincerely,

Brian Wood

There are no new affected parties.
I will work up AOR map.

Mr. Wood,

Has there been any change in the affected parties since the initial notice went out? That is, are there any new affected parties (as defined in Subsection A of [19.15.2.7](#) NMAC) in the AOR? If so, please notify them of the pending well, if not, just let me know. Either way, please submit an updated AOR map for the record.

Other than that the extension of time request is in good standing.

Thanks,

Dylan Rose-Coss
