

Initial Application

Part I

Received 5/24/2021

*This application is placed in file for record. It MAY or MAY NOT have been
reviewed to be determined Administratively Complete*

E4SSQ-210524-C-1080

APPLICATION FOR AUTHORIZATION TO INJECT

pBL2114851226

I. PURPOSE: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes No

II. OPERATOR: Seguro Oil and Gas LLC

ADDRESS: PO Box 3176, Midland, TX 79702

CONTACT PARTY: S. Paul Anderson

PHONE: (432) 219-0740 ext. 10

III. WELL DATA: Complete the data required on the reverse side of this form for each well proposed for injection.
Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? Yes No

If yes, give the Division order number authorizing the project: Division Order Number: R-7375-A, May 9, 1984

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

WFX-1043

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and,
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

*VIII. Attach appropriate geologic data on the injection zone including appropriate lithologic detail, geologic name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

*X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted).

*XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground sources of drinking water.

XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.

XIV. Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

NAME: S. Paul Anderson

TITLE: President

SIGNATURE: 

DATE: _____

E-MAIL ADDRESS: paul@seguro-llc.com

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstances of the earlier submittal: _____

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; Location by Section, Township and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District Offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and the name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) The intended purpose of the injection well; with the exact location of single wells or the Section, Township, and Range location of multiple wells;
- (3) The formation name and depth with expected maximum injection rates and pressures; and,
- (4) A notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, New Mexico 87505, within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

NOTICE
Seguro Oil and Gas LLC, PO Box 3176, Midland, TX 79702, Paul Anderson @ (432) 219-0740 Ext. 10, has filed a form C-108 (Application for Authorization to Inject) with the New Mexico Oil Conservation Division seeking administrative approval to convert the West Square Lake Unit #009 well as a water secondary recovery well.

The West Square Lake Unit #009 is located in Unit N, Section 35, Township 165, Range 30E, 620 FSL and 1445 FEL in Eddy County, New Mexico. The well will be used to inject produced water from wells operated by Seguro Oil and Gas, LLC into a perforated interval at a depth of 2926' to 3165' in the Grayburg-San Andres formations at an expected maximum injection rate of 750 BWPD, at a maximum injection pressure of 1267 psi.

Interested parties must file objections or requests for hearings with the Oil Conservation Division, 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, within 15 days. The name and address of the contact party for the application is Paul Anderson, Seguro Oil and Gas, LLC, PO Box 3176, Midland, TX 79702, (432) 219-0740 Ext. 10. The well is located approximately 4 miles North of Loco Hills, New Mexico.

C108 Data for WSLU #009

Item I. Purpose: Secondary Recovery

Item II. Operator: Seguro Oil & Gas, LLC,

Address: 407 N Big Spring Street Ste.215, Midland, TX 79701

Contact: Paul Anderson, 432-219-0740

Item III. Please see attached Well Bore Diagram

Item III((B)).

1. Name of Injection Formation & Pool: [57570] Square Lake; Grayburg-San Andres
2. Injection Interval: 2926 - 3165' (perforated)
3. Wells Initial Purpose: Originally drilled as a producer.
4. Please see well bore diagram
5. No productive interval higher is present higher than the proposed injection interval. The next lower interval containing commercial quantities of oil & gas is the Glorieta/Yeso and begins at approximately 4,500ft MD.

Item IV. This is an expansion of an existing project. Division Order Number: R-7375-A, May 9, 1984

Item V. Please See Attached

Item VI. Please see attached spreadsheet with tabulation of well data. WBD's for the P&A'd wells are within the excel sheet.

Item VII.

1. Avg Injection: 500bbls/day, Max Injection: 750bbls/day
2. Open System
3. Max Pressure: 1267psi, Avg Pressure: 1067psi
4. Please See Attached Water Analysis
5. Not Applicable

Item VIII.

Injection Zone (Grayburg/San Andres): The Grayburg consists of sands and dolomites. Sandstone lenses are gray, gray-light brown and fine to medium grained, semi-friable to consolidated and are approximately 5 – 20ft thick. The dolomite in the Grayburg and San Andres is tan to white-gray and sucrosic in part. Porosities range from 15-21% in the sandstones and 2-15% in the dolomites. Top of the Grayburg in the WSLU "6" #9 well is 2,755' (+1,034' SS), injection interval is 2,926 – 3,165'.

Fresh water aquifers are fairly limited in the area and are typically brackish. The town of Loco Hills (located 4miles south of the proposed injector) uses water from the Mescalero Escarpment in the Southern High Plains Aquifer System for its municipal needs. The oldest known strata in the region to produce potable water is within the Dockum Group, which is Triassic in age. Its formations from oldest to youngest include the Santa Rosa, Tecovas, Trujillo, Cooper Canyon, and Redonda formations. Please note: Dockum Group is also sometimes referred to in the literature as the Chinle Group.

A search was conducted through the New Mexico Office of the State Engineer in an effort to locate all fresh water sources in the area and is attached. Though no wells were located within the 1/2mile radius, average depth to water recorded in Eddy Co., NM, is 141ft (see attached spreadsheet). Also, the average depth of the Rustler anhydrite in this area is approximately 350ft MD.

Item IX. Treatment: 2500gal 15% HCL + 400gal Xylene. Please see attached Well Bore Diagram for detailed description of Stimulation.

X. Logging Data: Available through NMOCD website.

XI. Please see attached support data. There was a search conducted through the Office of the State Engineer and no fresh water wells were located within 1/2 mile of the proposed injector.

XII. All available geologic and engineering data has been reviewed, and it is the opinion of the applicant that there are no known faults or any other hydrologic connections between the injection interval and any underground sources of drinking water.

Statement provided by: Jack C. Bradley

XIII. To be completed

- *Statement of qualified person endorsing the application, including name, title, and qualifications.*

Jack Bradley – Geologist: Bachelors of Science in Geology (Sul Ross State University, 2009). 17 years of industry experience with focus in the Permian Basin.

Ross Pearson, P.E. – Operations Engineer: Bachelor of Science in Petroleum Engineering (New Mexico Institute of Mining & Technology, 1984_ TX License#70789). 36 years of Industry experience with focus in the Permian Basin.

Depth

Formation

Location J. Cleo Thompson RTZ "C" Lease Section ----- Township ----- Range -----
Square Lake Field - Body County, New Mexico - Blooder Sample

Total Dissolved Solids	<u>175,000</u>	mpl*	Specific Gravity	<u>1.116 @ 78°F.</u>
Calcium (Ca)	<u>7,000</u>	mpl	pH	<u>5.8</u>
Magnesium (Mg)	<u>3,000</u>	mpl	Iron (Fe)	<u>100</u> mpl
Chloride (Cl)	<u>110,000</u>	mpl	Total Hardness (CaCO ₃) (By Titration)	<u>ND</u> mpl
Sulfate (SO ₄)	<u>1,000</u>	mpl	Total Phosphate (P ₂ O ₅)	<u>ND</u> mpl
Carbonate (CO ₃)	<u>None</u>	mpl	Total Soluble Phosphate (P ₂ O ₅)	<u>ND</u> mpl
Bicarbonate (HCO ₃)	<u>85</u>	mpl	Soluble Poly- Phosphate (P ₂ O ₅)	<u>ND</u> mpl

Remarks: ND = Not determined.

* Milligrams per liter.
