**Subject:** RE: Emailing: DCP M 28 Line Work Plan Proposal

Looks like I copied Andres email down wrong...it should be [akraemer@slo.state.nm.us](mailto:akraemer@slo.state.nm.us) .

I'll see you at the job site between 0939-1000hrs.

Vernon,

I will shoot for 9:30 - 10:00 this morning to be on site. The email address for Mr. Kraemer @ SLO is not a good address. I was not able to find the right one Friday, but did leave a voice mail on his phone.

Mike

Mike, just let me know what time you'd like to meet. I should be out of our safety meeting about 0730hrs. Anytime after that I can head towards the job site. The saturated soil is being removed as I type and the same will happen Saturday.

Vernon,

At this time, I will approve (and recommend) that the highly saturated/contaminated material be removed, as soon as possible, to a disposal facility (land fill or land farm if guidelines allow and DCP chooses) in an effort to mitigate further contamination at the site. I need to physically inspect the site prior to making a decision on the remainder of the proposal. I will

tentatively plan on visiting the site Monday, July 18, 2011. If anyone would like to meet on site, I will be available after 6:30 AM Monday morning to coordinate a time to meet. Currently, contact for me is by email or cell phone (575-626-0857). Voicemail is not set up, so if no answer, keep trying, or I will return missed calls.
