Subject Unit

S/2 of Section 15

320 acres

Basin Fruitland Coal Gas Pool (71629)

Reference is made to your application filed on September 12, 2011.

You have requested to simultaneously dedicate the Subject Unit to the Subject Wells.

The Subject Unit is an existing gas spacing unit in the above-identified pool. Applicable well density rules for this pool allow two wells to be completed in each spacing unit, but require that the wells be in different quarter sections. Because new well is or will be completed within both quarter sections of the Subject Unit, division approval for simultaneous dedication is required.

Your application has been duly filed under the provisions of Division Rules 15.11.C [19.15.15.11.C NMAC] and 4.12.A [19.15.4.12.A NMAC].

It is our understanding you have proposed the simultaneous dedication of the Subject Unit to the Subject Wells for geological reasons, in order to prevent waste and maximize production from this unit. We further understand that notice of this application to offsetting operators or owners is unnecessary due to common ownership.

Pursuant to the authority granted by Rule 15.11.C, the above-described simultaneous dedication is hereby approved.

Jurisdiction of this case is retained for the entry of such further orders as the Division may deem necessary.

Sincerely,

A handwritten signature in black ink, appearing to read "Jami Bailey", with a stylized, cursive script.
