NATURE OF RELEASE

Type of Release	Produced fluid	Volume of Release	15bbls	Volume Recovered	13bbls
Source of Release	Water tank	Date and Hour of Occurrence	08/30/2011	Date and Hour of Discovery	08/30/2011 11:00 a.m.
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Water hauling company did not keep up with water in tank causing the tank to overflow.

Describe Area Affected and Cleanup Action Taken.*

Initially 15bbls were released from the water tank and we were able to recover 13bbls with a vacuum truck. The spill area measured 6' x 60' in front of the water and oil tanks inside the tank battery. All fluid was contained inside the tank battery walls. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
