Describe Cause of Problem and Remedial Action Taken.*
Construction crew tied in water transfer pump at the Myox 31 13 to wrong disposal line causing release. The water transfer pump was hooked up the appropriate line and returned to service.

Describe Area Affected and Cleanup Action Taken.*
Tetra Tech inspected site and collected soil samples to define spills extent. A work plan was submitted for approval. Once approved, the impacted soils, above the RRAL, were excavated and hauled for proper disposal. Based on the remedial activities performed, the excavation was backfilled with clean backfill material. Tetra Tech prepared closure report and submitted to NMOCD.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
