GD-6729-7769*

Dear Mr. LeMay:

Application to Downhole Commingle  
Jicarilla 22 No. 3A, Unit L, Sec. 22,  
T25N, R4W, Rio Arriba County, New Mexico

Conoco Inc. respectfully requests approval to downhole commingle the West Lindrith Gallup/Dakota Oil Pool with the Blanco Mesaverde Gas Pool.

Data relative to this commingling is listed below:

1. A lease plat (see Attachment 1).
2. C-116's are included providing the most recent tests for each zone (Attachments 2 and 3).
3. Decline curves for each horizon (Attachments 4 and 5).
4. The shut-in bottomhole pressure of the Mesaverde adjusted to the bottom of the Gallup/Dakota zone is 1514 psi. The shut-in bottomhole pressure of the Gallup/Dakota zone in the Jicarilla 22 No. 3A could not be obtained because the zone is currently isolated below a retrievable bridge plug. However, the bottomhole pressure of the Gallup/Dakota zone in the nearby Jicarilla 22 No. 6 is 784 psi. The pressure obtained from the Jicarilla 22 No. 6 should be representative of the bottomhole pressure of the Jicarilla 22 No. 3A.
5. Royalty and working interests are the same in both formations.
6. The quality and other characteristics of the oil and gas is similar and downhole commingling will not reduce the commercial value or create any operational problems associated with incompatible fluids. In fact, Conoco has already received NMOCD approval by Order PC-754 to surface commingle production from the Mesaverde and Gallup/Dakota formations in a common tank battery and in a common gas sales line (see Attachment 6).

Mr. William LeMay, Director  
Page 2  
November 21, 1989

7. The following allocation percentages are suggested based upon the ratio of production from each zone:

	<u>Oil</u>	<u>Gas</u>
Mesaverde	80%	68%
Gallup/Dakota	20%	32%

8. By copy of this letter we are notifying the Bureau of Land Management of the proposed commingling. Conoco is the only offset operator to this well.

Yours very truly,

David L. Wacker  
Division Manager

LEASE NAME	WELL NO.	LOCATION			DATE OF TEST	SPTS	CHOKE SIZE	TBG. PRESS.	DAILY ALLOW-ABLE	LENGTH OF TEST HOURS	PROD. DURING TEST			GAS - OIL RATIO CU:FT/BBL.	
		U	S	T							R	WATER BBL.S.	GRAV. OIL		OIL BBL.S.
Jicartilla 22	3A	L	22	25N	4W	11/17/88	PL 1.75	60		24	0	55.0	1	36	36000

**Instructions:**

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Division.

Gas volumes must be reported in MCF measured at a pressure base of 15,025 psia and a temperature of 60° F. Specific gravity base will be 0.60.  
 Report casing pressure in lieu of tubing pressure for any well producing through casing.

(See Rule 301, Rule 1116 & appropriate pool rules.)

I hereby certify that the above information is true and complete to the best of my knowledge and belief.

COMMINGLING ORDER PC-754

Conoco, Inc.  
P.O. Box 460  
Hobbs, NM 88240

Attention: David L. Wacker

LEASE NAME: Jicarilla "22" Lease  
DESCRIPTION: Sections 15, 16, 21 and 22, Township 25 North,  
Range 4 West, NMPM, Rio Arriba County, New Mexico.

The above-named company is hereby authorized to commingle West Lindrith Gallup Dakota and Blanco Mesaverde Pool production in a common tank battery and in a common gas sales line and to determine the production from each pool by well tests. (All commingled production must be of marginal nature; further the operator shall notify the Santa Fe Office of the Division in the event any well in the commingled battery becomes capable of top allowable production, at which time the Division will amend this order or take such other action as may be appropriate.)

NOTE: This installation shall be installed and operated in accordance with the applicable provisions of Rule 303 of the Division Rules and Regulations and the Division "Manual for the Installation and Operation of Commingling Facilities." It is the responsibility of the producer to notify the transporter of this commingling authority.

REMARKS: Gas production from current or future Mesaverde gas wells shall be separated and metered prior to being commingled in a common sales line.

DONE at Santa Fe, New Mexico, on this 26th day of October, 1988.
