NATURE OF RELEASE Type of Release: Produced water Volume of Release: 30 bbls produced water Source of Release: Water Transfer Pump Date and Hour of Occurrence 4/20/12 Time unknown Was Immediate Notice Given? Was a Watercourse Reached? Date and Hour of Describe Fully.* Was a Watercourse was Impacted, Describe Fully.* Describe Cause of Problem and Remedial Action Taken.* A 2" X 11/2" connection on the discharge of the water transfer pump broke. The connection and the associated piping were replaced. Describe Area Affected and Cleanup Action Taken.* An area covering approximately 2300 sq. ft inside the earthen containment around the tanks and pump were affected by the release along with approximately 200 sq.ft outside the containment area due to the spray from the broken fitting. All of the free standing liquid was recovered with a vacuum truck. A sampling event will be scheduled the week of 5/7/12 to determine the vertical extent of the release. The replied will be remediated following the NMOCD guidelines for spill remediation. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and

regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other
federal, state, or local laws and/or regulations.
