RE: Application for exception to NMOCD Rule 303-A: Downhole Commingle
State of New Mexico Keys Unit No. 1E: 1750' FNL & 1770' FWL
Unit F, Sec. 32-T29N-R10W, NMPM, San Juan County, New Mexico

Dear Mr. Stogner:

Texaco respectfully requests administrative approval to downhole commingle the Armenta Gallup Oil Pool and Basin Dakota Gas Pool within the referenced well. Approval of this application would require an exception to NMOCD Rule 303-A. Texaco has notified all offset operators to the referenced spacing unit. Please find attached, the return receipt cards signed by each operator.

Production methods are limited due to the 4-1/2" production casing the well is completed with. This size of casing does not offer sufficient room to run adequately sized tubing strings to each formation. The downhole commingling of these zones will offer an economical method of production without reservoir damage, waste of reserves, or violation of correlative rights.

If you have any questions concerning this matter please contact Mr. Darren Segrest at (505) 325-4397. Your attention to this matter is greatly appreciated.

Sincerely,

Ted A. Tipton / DBS
