Describe Cause of Problem and Remedial Action Taken.*

A six (6)-inch low pressure natural gas pipeline developed a leak, resulting in a release of natural gas, crude oil and produced water. During initial response activities the pipeline was shut-in to mitigate the release. Following initial response activities, the affected pipeline segment will be replaced with 6 inch poly line and returned to service.

Describe Area Affected and Cleanup Action Taken.*

An area of pasture land measuring approximately 13,000 square feet was affected by airborne liquids. An area of pasture land measuring approximately 1,000 square feet was affected by liquids flowing from the release point. The release will be remediated according to NMOCD regulatory guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
