Brad

As agent for John H. Hendri Corporation (JHHC), Trident Environmental submits the attached *2011 Operations and Monitoring Report* to the NM CD for the JHHC Centralized Surface Waste Management Facility (NM-02-021) in Lea County New Mexico. A hard copy of this report and one copy on compact disk is being sent to you via USPS Certified Mail (#7009 2250 0001 4928 0308). A copy will also be provided to the District 1 office in Hobbs.

We appreciate the opportunity to work with you on this project. Please feel free to call me at 432-638-8740 or Carolyn Haynes at 575-390-9689, if you have any questions.

Thanks - Gil

**Re: Centralized Surface Waste Management Facility NM-02-0021
2011 Operations and Monitoring Report
John H. Hendrix Corporation
Section 15, Township 24 South, Range 36 East, Lea County, New Mexico**

Dear Mr. Jones:

Trident Environmental, as agent for John H. Hendrix Corporation (JHHC), submits this report to the New Mexico Oil Conservation Division (OCD) for centralized surface waste management facility NM-02-0021 (facility). This report presents the operations, maintenance and monitoring results for soil and groundwater samples collected during calendar year 2011, and includes historical background information. The facility occupies approximately 200 acres in Section 15, Township 24 South, Range 36 East, Lea County, New Mexico as shown in Figure 1.

Operation Background

OCD issued permit number NM-02-0021 to JHHC on November 29, 2004 to construct and operate a centralized surface waste management facility for treating non-hazardous petroleum hydrocarbon-impacted soil resulting from spills, releases and pits from JHHC oil and gas operations.

The facility consists of twelve main cells, numbered 1 through 12. Each 12 acre cell measures approximately 400 ft (north-south) by 1450 ft (east-west) as depicted in Figure 2. The main cells are subdivided into three sub-cells, lettered A, B, and C, each measuring approximately 400 ft x 480 ft (4.40 acres). Cells 10B and 10C no longer receive imported soil and are tilled once every two weeks (biweekly) to enhance the biodegradation of petroleum hydrocarbons. Cells 1A, 1B, and 1C are closed, and cells 11 and 12 have reached capacity and discontinued accepting imported soil.

John H. Hendrix Corporation
2011 Annual Operations and Monitoring Report
JHHC Landfarm (NM-02-021)

No soils were transported to the landfarm during 2010 and 2011. Transport dates and total volumes for referenced cells since landfarm operations began are summarized below.

Transport Dates and Volumes

Cell	Transportation of Soils		Total Volume (yd ³)
	Began	Ended	
12	03/01/2005	12/12/2006	14,887
1	06/13/2006	02/20/2007	11,116
11	09/17/2007	05/30/2008	26,047
10	06/02/2008	10/22/2009	8,981
		Total	61,391

Sampling Procedures

Soil samples are collected from the active cells according to a semi-annual (twice yearly) schedule approved by the OCD in the permit modification on January 4, 2006. During each event of the 2011 reporting period, soil samples were collected using a decontaminated hand auger, placed in pre-cleaned 4-ounce jars, properly labeled, and placed in an ice-filled cooler. During each sampling event, a backhoe was utilized to clear the first 12-18 inches of treatment zone soils to minimize chances of cross-contamination prior to advancing the hand auger. Sample locations were recorded using a handheld global positioning device (Garmin eTrex™ GPS) as shown in Figures 2 and 3. The auger holes were backfilled with bentonite and hydrated with potable water. Samples were hand-delivered under chain of custody to Cardinal Laboratories (Hobbs, NM) for analysis.

During the first 2011 semi-annual event on April 4, 2011, and the annual sampling event on October 18, 2011, samples were randomly collected at cells 1A, 1B, 1C, 10B, 10C, 11A, 11B, 11C, 12A, 12B, and 12C within the treatment zone (approximately 1 ft below the surface) and the vadose zone (approximately 3 ft below the surface). The treatment zone samples were analyzed for BTEX, TPH, and chloride, while the vadose zone samples were analyzed for BTEX, TPH, metals (arsenic, barium, cadmium, chromium, lead, mercury, selenium, silver, iron, copper, manganese, and zinc) and major ions (total alkalinity, bicarbonate, calcium, magnesium, potassium, sodium, chloride and sulfate).

Soil Analytical Results

The complete historical summary of analytical results for the background, treatment zone, and vadose zone samples are listed in Tables 1 (BTEX, TPH, and chloride), Table 2 (metals), and Table 3 (major ions). Laboratory analytical reports, chains of custody, and sample locations are included in Appendix A.

At the request of NMOCD after the first sampling event in April 2010, Trident Environmental performed an assessment of the potential occurrence of downward migration (exceedence of background conditions) of constituents of concern (COCs) into the vadose zone at the JHHC landfarm. The *Vadose Zone Monitoring Report* was submitted to NMOCD on October 11, 2010, and provided detailed explanations of the comparisons, analyses, and conclusions made. Based on the findings of the vadose zone monitoring assessment and subsequent analytical results, there is no indication of COCs migrating downward to the vadose zone. Activities and operations conducted at the JHHC landfarm are protective of public health, safety and the environment.

Treatment (Tilled) Zone Samples

The treatment zone sample results are compared to target remediation levels established in the permit (10 mg/kg for benzene, 50 mg/kg for BTEX, 100 mg/kg for TPH, and 1,000 mg/kg for chloride).

As summarized in Table 1, benzene and BTEX concentrations in the treatment zone were below the method detection limits (0.05 mg/kg and 0.300 mg/kg, respectively) for all cells during each sampling event in 2011. As of the most recent sampling event, the 100 mg/kg target remediation level for TPH in the treatment zone has been met for cells 1A, 1B, 1C, 10C, 11C, 12A, and 12C, and only slightly exceeded in cells 10B (395 mg/kg), 11A (254 mg/kg), 11B (619 mg/kg), and 12B (602 mg/kg).

Vadose Zone Samples

The vadose zone sample results are compared to the background soil concentrations to evaluate potential infiltration of anthropogenic constituents of concern into the underlying native soils.

For both sampling events during 2011, benzene, BTEX and TPH concentrations in the vadose zone samples in each sampled cell are comparable to background levels and were less than the method detection limits (0.050 mg/kg, 0.300 mg/kg, and 20 mg/kg, respectively) for these constituents, which supports the conclusion that there is no migration of these constituents to underlying soils.

Chloride concentrations within the vadose zone during the most recent sampling event ranged from less than 4 mg/kg to 368 mg/kg, well below the 1,000 mg/kg permitted level, and with no evidence of downward migration. These levels are well below concentrations considered protective of groundwater which is greater than 145 ft below ground surface, particularly when considering that the average chloride concentrations in the treatment and vadose zones for all cells sampled on October 18, 2011, were less than 55.5 mg/kg and 74.9 mg/kg, respectively. In addition, chloride concentrations in the treatment zone have always been well below concentrations considered protective of groundwater.

Metal and major ion constituents within the vadose zone are consistent with background concentrations and normal variations, and there are no distinguishable trends of increasing

concentrations over time. Some variability in metal and major ion concentrations is expected due to differences in soil mineralogy. Certain trace metal COCs (arsenic, cadmium, chromium, lead, and silver) slightly exceeded the higher of the PQL or background screening value; however, statistical analysis and geochemical correlation plots show no indications that trace metal COCs have migrated into the vadose zone as explained in the *Vadose Zone Monitoring Report*. It is also important to note that the concentrations of these metal COCs in the TZ have consistently been less than the VZ values in cells 1A, 1B, 10B, 10C, 11B, and 12C, which allows no explanation for a source of metal COCs in the TZ to potentially migrate into the VZ and result in a higher concentration than that measured in the TZ. Thus, there is no evidence of anthropogenic sources for these constituents within the vadose zone.

Groundwater Conditions

The intended purpose for the groundwater monitoring well network was to establish baseline (background) conditions in 2005 prior to initiating use of the landfarm. That purpose has long since been achieved. A groundwater monitoring well network for a centralized surface waste management facility is not a requirement under past Rule 711, or under current rule 19.15.36 regulations, particularly for a site where depth to groundwater is greater than 100 ft below the bottom of the treatment cells. For reasons cited above, OCD granted administrative approval to suspend groundwater sampling via email on February 22, 2010.

Recommendations

It is recommended that further sampling and tilling of cells 1A, 1B, 1C, 11A, 11B, 11C, 12A, 12B, and 12C be discontinued since laboratory results have consistently shown that benzene, BTEX, TPH, and chloride are below the permitted remediation target levels of 10 mg/kg, 50 mg/kg, 100 mg/kg, and 1,000 mg/kg, respectively. In fact, with the exception of TPH in cells 10B and 10C, and slight TPH exceedences in cells 11A, 11B, and 12C, all other treatment zone soils at the JHHC landfarm have been remediated such that they meet the closure performance standards specified in NMAC 19.15.36.15(F) as follows:

- (1) Benzene, as determined by EPA SW-846 method 8021B, does not exceed 0.2 mg/kg.
- (2) Total BTEX, as determined by EPA SW-846 method 8021B, does not exceed 50 mg/kg.
- (3) The GRO and DRO combined fractions (TPH), as determined by EPA SW-846 method 8015M, does not exceed 500 mg/kg.
- (4) Chloride, as determined by EPA method 4500-C1 B, does not exceed 1,000 mg/kg (the landfarm is located where ground water is more than 100 feet below the lowest elevation at which the JHHC has placed the treatment zone soils).

John H. Hendrix Corporation
2011 Annual Operations and Monitoring Report
JHHC Landfarm (NM-02-021)

Soil samples will continue to be collected from the treatment and vadose zones in cells 10B and 10C until it is confirmed that target remediation levels have been met. Tilling of the treatment zone will continue in cells 10B and 10C to further degrade the petroleum hydrocarbons until remediation target levels are achieved.

JHHC will continue reporting analytical results to the OCD within 45 days after receipt of the laboratory reports.

We appreciate the opportunity to work with you on this project. Please feel free to call me at 432-638-8740 or Carolyn Haynes at 575-390-9689, if you have any questions.

Sincerely,

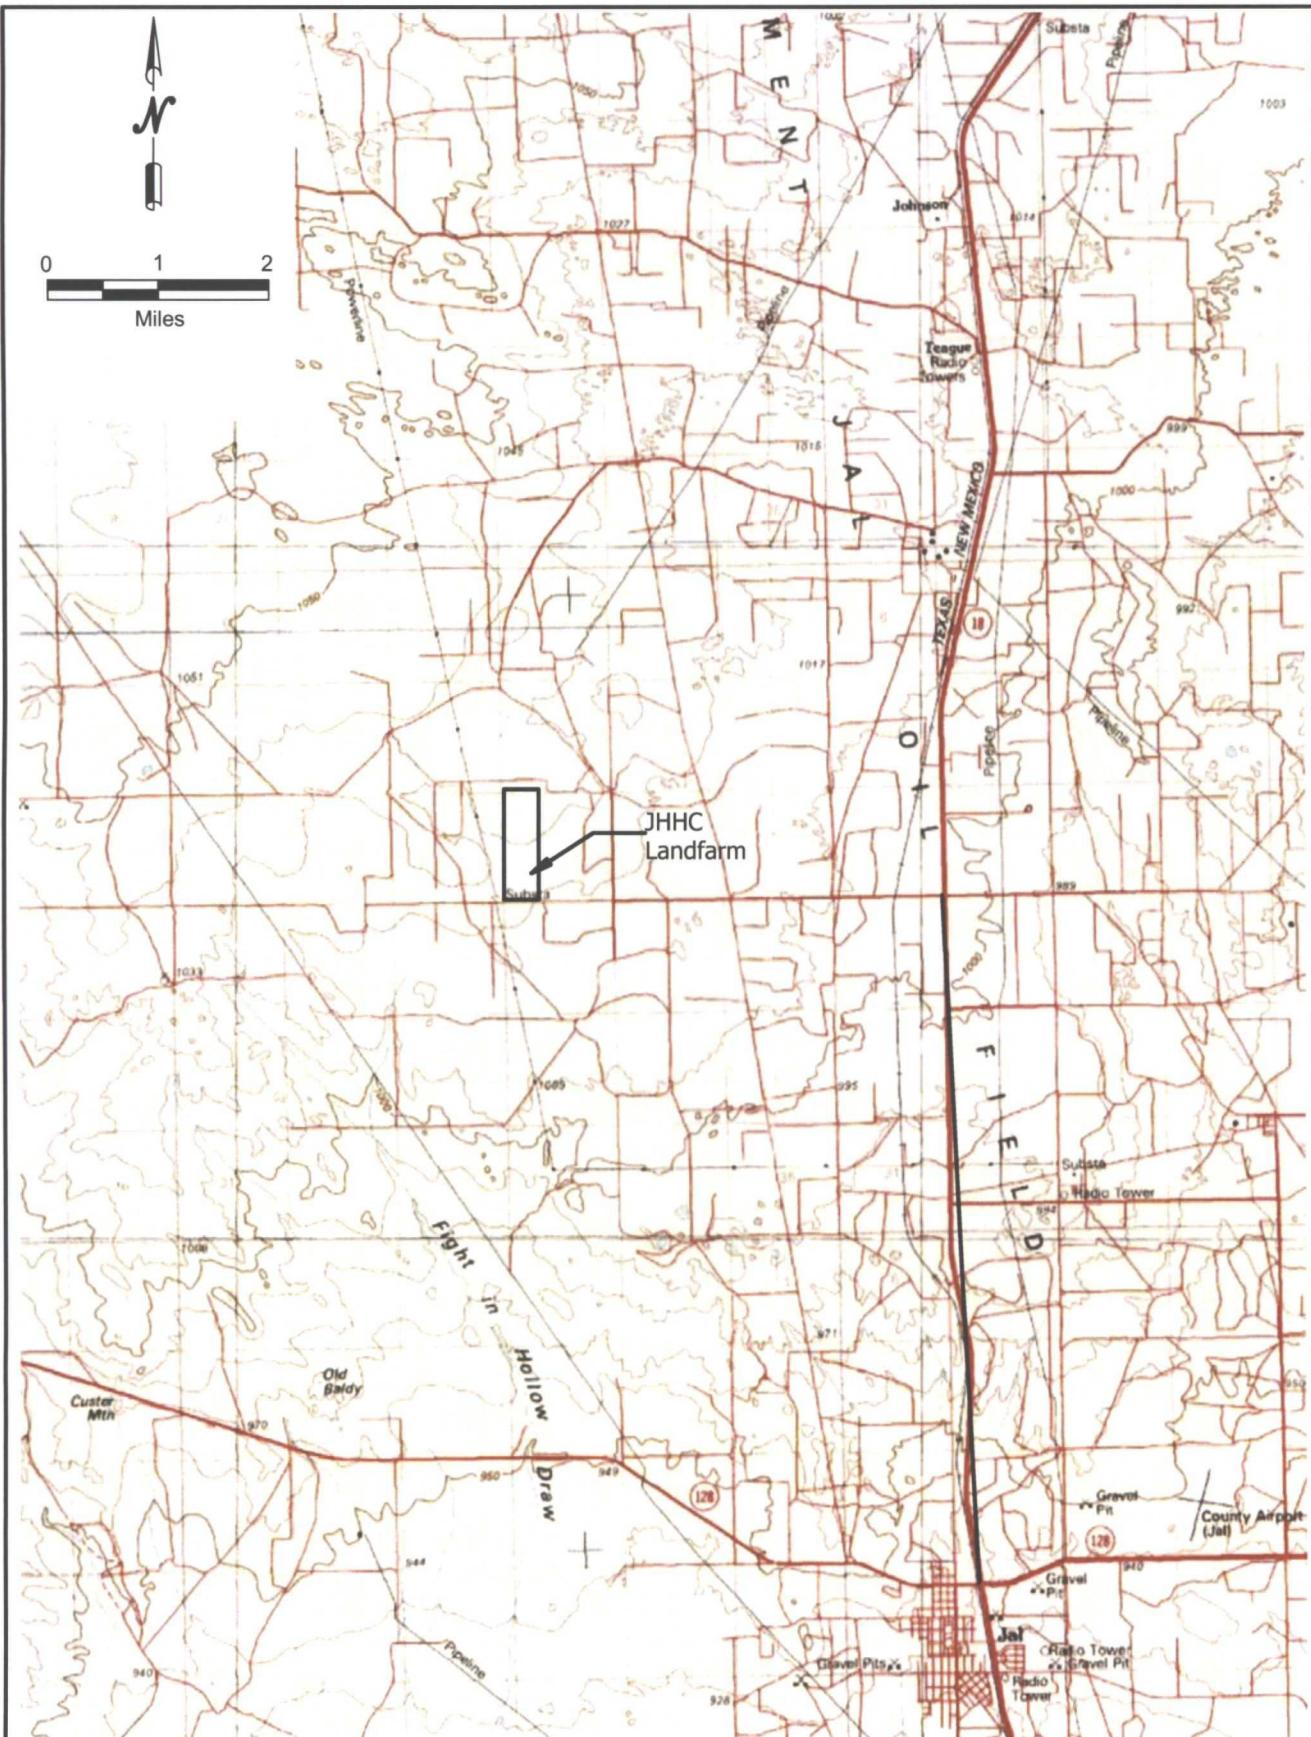

Gilbert J. Van Deventer, REM, PG
Trident Environmental - Project Manager

APPENDIX A

Laboratory Analytical Reports and Chains of Custody

PHONE (575) 393-2326 • 101 E. MARLAND • HOBBS, NM 88240

November 10, 2011

CAROLYN DORAN HAYNES

JOHN H. HENDRIX CORPORATION

P. O. BOX 3040

MIDLAND, TX 79702

RE: JHHC SWMF NM-02-0021

Enclosed are the results of analyses for samples received by the laboratory on 10/18/11 17:30.

Cardinal Laboratories is accredited through Texas NELAP for:

Method SW-846 8021 Benzene, Toluene, Ethyl Benzene, and Total Xylenes
Method SW-846 8260 Benzene, Toluene, Ethyl Benzene, and Total Xylenes
Method TX 1005 Total Petroleum Hydrocarbons

Certificate number T104704398-08-TX. Accreditation applies to solid and chemical materials and non-potable water matrices.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2 Haloacetic Acids (HAA-5)
Method EPA 524.2 Total Trihalomethanes (TTHM)
Method EPA 524.4 Regulated VOCs (V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Celey D. Keene".

Celey D. Keene

Lab Director/Quality Manager

Cardinal Laboratories

*=Accredited Analyte

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such damage is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such losses are based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such basis upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such bases upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

- M5 Sample chosen for matrix spike. Spike recovery less than 30%, possible matrix interference in sample.
- J Detected but below the Reporting Limit; therefore, result is an estimated concentration (CLP J-Flag).
- GAL Analysis subcontracted to Green Analytical Laboratories, a subsidiary of Cardinal Laboratories.
- B1 Target analyte detected in method blank at or above method reporting limit. Sample concentration found to be 10 times above the concentration found in the method blank or less than the reporting limit.
- ND Analyte NOT DETECTED at or above the reporting limit
- RPD Relative Percent Difference
- ** Samples not received at proper temperature of 6°C or below.
- *** Insufficient time to reach temperature.
- Chloride by SM4500Cl-B does not require samples be received at or below 6°C
- Samples reported on an as received basis (wet) unless otherwise noted on report
