Re: **Request for Administrative Approval**

Non-Standard Location

Central Vacuum Unit #222 (Presently Vacuum Glorieta West Unit #29)

30-025-31785

2522' FSL & 2283' FWL

Unit K, Sec 25, T17S, R34E

Lea County, New Mexico

Chevron U.S.A. Inc. respectfully requests administrative approval for a Non-Standard location, for the Central Vacuum Unit Well #222. This well is presently the Vacuum Glorieta West Unit #29, which is a TA'd wellbore with no further potential in the Vacuum Glorieta West Unit unitized interval. Reviewing its salvage opportunities, the only reservoir affording the potential to recover additional hydrocarbons is the San Andres formation. If the San Andres cannot be produced, the well will be plugged and abandoned. This well is located within the unit boundary of the Central Vacuum Unit, however it is located only 118' from a quarter/quarter section line which is also a northern boundary of the Central Vacuum Unit making it an unorthodox location. The San Andres reservoir on the property to the north (the direction of unit boundary encroachment) is produced under primary recovery methods only and the 40 acre proration unit offsetting this proposal has one remaining San Andres completion which is marginally producing at 3 BOPD, 1 MCFPD and 180 BWPD. This recompletion is necessary to salvage the wellbore and potentially access San Andres reserves at the subject location.

A copy of this application has been mailed via certified mail to XTO & Exxon Mobil for their consideration.

If you require additional information, please contact me at 432-687-7375, or by email at:
