If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

During the investigation of legacy soil impacts at the GCU 169E free floating hydrocarbon was discovered on the water table. The water table is located about 4 feet below grade. The immediate investigation of impacts revealed that they are contained in a small area less than 50 feet in diameter. No private or public water wells are known to exist in the immediate area or down gradient of the site. The landowner has been informed of the impacts.

Describe Area Affected and Cleanup Action Taken.*

The area is currently undergoing further investigation and remediation of impacted areas.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
