Attention: Mr. Bryan Lewis

Re: Surface Commingling Application
Juniper Lease
San Juan County, New Mexico

Dear Mr. Lewis:

I have conducted a preliminary review of your application dated May 17, 2005 to surface commingle Basin-Fruitland Coal Gas Pool production from five wells on your Juniper Lease in San Juan County, New Mexico. Please be advised that your application is deficient in the following areas:

- 1) this type of application needs to be accompanied by Division Form C-107-B (copy enclosed);
- 2) a copy of the surface commingling application is required to be furnished to all owners of interest in the production to be commingled; and
- 3) an detailed explanation or formula for allocating production to each of the subject wells using allocation meter and sales meter volume data.

Please submit the requested information. At that time, I will continue to process the application.

Sincerely,

David Catanach
Engineer

RE: Application for Surface Commingling

Dear Messrs. Fesmire and Lovato:

This letter is further to Coleman's Application for Surface Commingling letter dated May 17, 2005 regarding approval to surface commingle the gas production from the wells listed below:

TOWNSHIP 24 NORTH, RANGE 10 WEST, NMPM

Juniper Com 4 #12	Section 04	SWNW
Juniper Com 5 #14	Section 05	SWSW
Juniper Com 5 #32	Section 05	SWNE
Juniper Com 6 #14	Section 06	SWSW
Juniper Com 6 #41	Section 06	NENE

Basin Fruitland Coal
San Juan County, New Mexico

2. **Item 1) from David Catanach (with NMOCD) letter dated 05/24/05:** Division Form C-107-B is attached.
3. **Item 2) from David Catanach (with NMOCD) letter dated 05/24/05:** Photocopies of the certified return requested mailing to all revenue owners in the affected lands is attached.
4. **Item 3) from David Catanach (with NMOCD) letter dated 05/24/05:** Detailed explanation or formula for allocating production to each of the subject wells using allocation meter and sales meter volume data.

***Allocation Formula.** All wells have an allocation meter on location. The production assigned to each well will be the integrated volume from the CPD meter less the sum of the other allocation meters plus lease use gas. As an example, the CPD meter indicates total production of 3,325 MCF. Other well 1 allocation meter indicates 400 MCF production. Other well 2 allocation meter indicates 350 MCF production. Other well 3 allocation meter indicates 1,200 MCF production. Other well 4 allocation meter indicates 275 MCF production. The sum of these other well allocation meters is 2,225 MCF. CPD meter of 3,325 MCF less the sum of other allocation meters of 2,225 MCF plus lease use gas of 2 MCF is 1,102 MCF, the calculated production of the well in question. When the sum of the allocation meters doesn't equal the CPD meter, the gas production from each well will be calculated according to the volume its allocation meter indicates was produced divided by the sum of all of the allocation meters (percent) multiplied by the CPD meter indicated production plus lease use gas. As an example, the CPD meter indicates an integrated volume of 40,000 MCF gas was produced but the sum of the allocation meters indicate that 39,000 MCF was produced. The allocation meter of the well in question indicates 10,000 MCF of production divided by the sum of the allocation meters (39,000 MCF) equals 25.64% multiplied by the CPD meter volume of 40,000 MCF equals 10,256 MCF plus lease use gas of 60 MCF totals 10,316 MCF, the calculated production of the well in question. To the extent that the wells covered by this Application for Surface Commingling are drilled on or communitized with Navajo Allotted Leases, Applicant will allocate the gas production and sales according to the Guidelines for Surface Commingling and / or Off-lease Sales, Storage, Usage and Measurement for Navajo Allotted Leases. Royalties will be paid on the volumes according to applicable MMS guidelines.*

The original Application letter dated May 17, 2005 is hereby amended to incorporate these changes.
