Mr. Stogner, I believe that my agent Jim Schultz files an NSL for the Samantha B Federal #1 in Chaves County, NM on May 20th. Do you know the status of this NSL? Please let me know if there is more information required.

Thanks,  
April D. McKay

RE: pSEM0-509729980  
McKay Oil Corporation's proposed Samantha "B" Federal Well No. to be drilled 660' FSL  
& 2080' FEL (O) Sec. 31-T5S-R22E, Chaves County.

DATE: April 22, 2005

---

I received your letter of application for the Samantha "B" Fed. #1 to be drilled at a "Non Standard Location." From what little information you provided, it would appear this application can be processed administratively; however, as submitted - it is incomplete and is therefore **denied**.

- (1) You did not say what formation this well is unorthodox for or its intended spacing unit;
- (2) You say that a Texas/NM pipeline ran directly through the original pad for the proposed well being 660' FSL & 1980' FEL and that a move further south would be too close to the Section line; why then couldn't the well be moved north and/or east and not towards the east/west quarter section line?
- (3) If you do not choose to move the well to a standard location and plan to reapply, please submit land plats, topographic maps, and a schematic of the pipeline as it traverses through Sec. 31 and any other topographic features precluding McKay from relocating to a standard location.

I will keep your application on file and will supplemental any subsequent re-filing, if you so choose.
