Oil Conservation Division  
1220 S. St. Francis Drive  
Santa Fe, NM 87505

Dear Mr. Stogner

This is a request for administrative approval for a non-standard gas well location in the Basin Fruitland Coal pool.

The EPNG A #100S is staked at an unorthodox location due to terrain and proximity to the Navajo Reservoir. Wells under Bureau of Reclamation jurisdiction must be at least 500' from the high water mark of the reservoir. As a result, no suitable location could be found within the FC window. Consequently, this location was staked non-standard for the Fruitland Coal formation, to best fit the terrain. See the attached topo map for further clarification.

Production from the Fruitland Coal is included in the 320-acre gas spacing unit, the east half dedication of Section 21, T32N, R06W.

To comply with the New Mexico Oil Conservation Division rules, we are submitting the following for your approval of this non-standard location:

1. C102 plat showing location of the well.
2. Topo Map
3. Aerial Map
4. Plat showing offset owners/operators, of which Burlington is its own offset/operator of the affected side to the section.
5. Affidavit of notification of offset owner/operators

A copy of this application is being submitted to all offset owners/operators by certified mail with a request that they furnish your office in Santa Fe a Waiver of Objection and return one copy to this office.

Sincerely,

Joni Clark  
Sr. Regulatory Specialist
