IN REPLY REFER TO:
Jicarilla Contract 155
3162.3-2 (07327)

Pamela W. Staley
Amoco Production Company
1670 Broadway, P. O. Box 800
Denver, Colorado 80201

Dear Ms. Staley

We have reviewed your application to downhole commingle production from the Basin Dakota and Otero Chacra pools in the following well:

Jicarilla Gas Com B #1
1450' FNL, 1850' FEL, Section 31, T-26N, R-5W
Rio Arriba County, New Mexico

Commingling production from the two pools in the same wellbore will allow installation of a plunger lift system to assist in removal of produced fluids from the wellbore. Keeping the wellbore relatively free of fluids will increase natural gas production from both formations by an estimated 40%. This will result in immediate and long term economic benefits to working interest entities and the Jicarilla Tribe. The following allocation factors, based on sound engineering practices, will be used to allocate future production from each formation.

	<u>Gas</u>	<u>Oil</u>
Dakota	85%	100%
Chacra	15%	-0-%

Your application is hereby approved as submitted, effective the date that production is actually combined.

Please be advised that operational approvals for Jicarilla production are normally processed through the Rio Puerco Resource Area in Albuquerque, NM. Please notify the Rio Puerco Resource Area when the actual commingling takes place.

If you have any questions regarding this correspondence, please contact Robert Kent in the Rio Puerco Office at (505) 761-8762.

Sincerely,

/s/ Duane Spencer
