Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			
If a Watercourse was Impacted, Describe Fully.*					
Describe Cause of Problem and Remedial Action Taken.*					
Our 4" produced water discharge line corroded and released fluid onto the SRO 102 SWD location. The discharge line has been repaired and returned to service.					
Describe Area Affected and Cleanup Action Taken.*					
Initially approximately 75bbls were released onto the pad location at the SRO 102 SWD. We were unable to recover any of the fluid with vacuum trucks. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation work.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Mr. Bratcher,

Please see attached the C-141 Initial Report for a release that occurred at our SRO 102 SWD. We have equipment on location and are planning to take soil samples as soon as possible.

Thank you,

Joshua Russo

Subject: SRO 102 SWD-Immediate Notification

Mr. Bratcher:

On 10/21/2012 at approximately 6:00 pm, a produced water release was discovered at the above-referenced facility. An estimated 75 bbls of produced water was released with no fluid being recovered. All of the fluid remained on the battery pad. The cause of the release was a failure in the 4" discharge line to the injection well. We will get more details and follow up with a C-141 Report.

GPS coordinates, legal description, and driving directions below.
