Re: Application for surface commingling, Culebra Bluff South Pool (Code 15011), Eddy County, NM (T23S-R28E, Sec 26)

Dear Mr. Ezeanyim,

Chevron Midcontinent, L.P. respectfully requests administrative approval to surface commingle oil, gas, and water production from the South Culebra Bone Spring Pool through Chevron's Pardue Farms Battery and Compressor Station. Wells producing to this battery include the Chevron Softail AV 26-2H and the Pardue Farms 26-1 (both horizontally drilled in 2012 into the Avalon zone of the Bone Springs Formation, attached map). These wells are located in section 26, T23S-28E, Eddy County, New Mexico. APDs for each well, which includes surface plats, are included with this notification.

The purpose of this request will allow greater precision to measure production variations from each well. Chevron plans to add a test separator between the Softail AV 26-2H and the facility, and will configure the valves at the production header so that the Pardue Farms 26-1 will always flow through the existing test separator. This change will enable independent and continuous metering of the Pardue Farms 26-1 and Softail AV 26-2H wells. A schematic showing this configuration is attached, along with tables that show daily production rates and tubing/casing pressures to date from these new wells. The Pardue Farms 26-1 is currently shut-in pending this requested action.

Although the list of Working Interest Owners (WIO) is identical for the two wells, there are slight differences in the Royalty Interest Owners (RIO). Names of all WIO and RIO for each well is are included with this request, and all of these owners are being notified of this request and that each will have 20 days with which to object to the commingling request per NMOCD Rule 19.15.12.10 SURFACE COMMINGLING C. (4) c.

Sincerely,

Greg Minnery
