The circulating pump had a 1/2" valve open which allowed for the release of fluid. The valve has been closed.					
Describe Area Affected and Cleanup Action Taken.*					
Initially 163bbbls were released from the circulating pump and we were able to recover 160bbbls with vacuum trucks. The release was contained inside the lined facility. All free fluid has been recovered. Contaminated gravel has been removed from the facility and has been replaced with fresh gravel. The facility has been returned to its prior condition.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
