If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
Failure in a 2" valve on the discharge line caused 175 bbls of produce water to leak onto the ground. Fluids were not recoverable. The valve was repaired.

Describe Area Affected and Cleanup Action Taken.\*  
Failure in a 2" valve on the discharge line caused 175 bbls of produce water to leak onto the ground. Fluids were not recoverable. Remediation will be performed in accordance with an OCD and BLM approved remediation plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: Righthand canyon 35-7 SWD

This is to inform you that Oxy Permian Primary had a spill of produced water at the Righthand canyon 35-7 SWD on December 27, 2012. Oxy released 175 bbls of produced water, 0 bbls was recovered. Leak was due to failure in the 2" valve on the discharge line. Oxy will have BBC do some initial remediation, a C-141 to follow. BBC will delineate at a later date.
