**RE: 2011 Groundwater Monitoring Report for the Legacy Reserves Operating, L.P.'s  
Monsanto '30' State #5 Release Site (1R-777)  
Unit Letter O, Section 30, T16S, R37E, NMPM, Lea County, New Mexico  
Recommendations Approval – Implementation and Submittal Extension Approval**

Dear Mr. Johnson:

The New Mexico Oil Conservation Division (OCD) has reviewed your request (dated February 4, 2013 and November 6, 2012) for extension of the recommendations implementation and submittal of a ground water remediation plan for the Remediation Plan (1R-777) for the above-referenced site. The OCD hereby approves the request for extension of the recommendations implementation and submittal of a ground water remediation plan until **Monday, May 6, 2013**.

Please be advised that OCD approval of this extension does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

If you have any questions regarding this matter, please contact me at 505-476-3489.

Edward J. Hansen  
Hydrologist  
Environmental Bureau

P.S.: Please keep in mind that an annual report for this site is due to be submitted to the OCD by April 1, 2013.

Hello Mr. Hansen,

I just wanted to let you know that we had to apply for new drilling permits for the above referenced facilities. Neither myself or Kimberly Wilson from our office could make any headway with the Land Office on this. The State Engineer's office told us that the permits looked in order and that they would let us know soon. Please let me know if you have any questions or if I have to make another time extension request for these projects. Thank you.

Respectfully,

**David J. Adkins**

Subject: 2011 Groundwater Monitoring Report, Legacy Reserves Operating, LP's  
Monsanto '30' State No. 5 Release Site (1R-777)  
Unit Letter O, Section 30, Township 16 South, Range 37 East  
NMPM, Lea County, New Mexico  
Recommendations Approval – Extension Request

Dear Mr. Hansen,

On behalf of Legacy Reserves Operating, LP, we respectfully request a 3-month extension to finalize the approved recommendations for the Monsanto '30' State No. 5 Release Site (1R-777). These recommendations include the installation two groundwater monitoring wells, survey of identified wells and submittal of a remediation plan for pumping and disposal of impacted groundwater to the NMOCD for review. August 7, 2012 was the original date set by the NMOCD for these activities to be completed. However our client, Legacy Reserves, has not yet received the required permits from the New Mexico State Lands Office due to legal matters regarding the surface and subsurface rights of the site. With NMOCD approval, the recommendations will be completed and a remediation plan will be submitted to the NMOCD for review. Should you have any questions or if further information is required, please do not hesitate to contact David Adkins of Talon/LPE at 575.746.8768 or 575.441.4835. Thank you for your time and consideration in this matter.

Respectfully submitted,

David J. Adkins  
District Manager  
Talon/LPE, Artesia, New Mexico
