Attention: Ms. Pamela Staley

*Lackey Well No. 1E
Unit I, Section 23, Township 28 North, Range 9 West, NMPM,
San Juan County, New Mexico.
Basin Dakota (Prorated Gas - 71599) and
Blanco Mesaverde (Gas - 72319) and
Otero Chacra (Gas - 82329) Pools*

Dear Ms. Staley:

Reference is made to your recent application for an exception to Rule 303.A. of the Division Rules and Regulations to permit the subject well to commingle production from multiple pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the subject zones is hereby placed in abeyance.

The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

Assignment of allowable to the well and allocation of production from the well shall be on the basis of determining total gas production and then subtracting Dakota production. Remaining production shall be allocated as follows:

Dakota Pool	Subtract from total production.	
Blanco Mesaverde Pool	Oil 100%	Gas 90%
Otero Chacra Pool	Oil 0%	Gas 10%

The percentage of Dakota condensate production shall be equal to the percentage of the Dakota gas production.

REMARKS: The operator shall notify the Aztec District Office of the Division upon implementation of the commingling process.

Pursuant to Rule 303.H., the commingling authority granted by the order may be rescinded by the Division Director if, in his opinion, conservation is not being best served by such commingling.

Approved at Santa Fe, New Mexico on this 19th day of June, 1996.
