**Attachments:** finalbatementplan.pdf

Mike, this is to notify you (I also called and left a message) that we plan to move a rig to the site on Monday to perform the boring and sampling of the pit site and start the pit closure. We will be performing the work as described in the 10/13/2009 abatement plan. (copy attached)

We should be on site around 10:00 MST and Jeff Kindley will be the site supervisor, his cell phone number is 432-634-2263. It should take 2 days to perform the borings and an additional 2-3 days to get the lab results before excavation will begin.

If you have any questions please call Jeff or myself at the number below. Thanks
