RECEIVED

MAR 08 2013

NMOCD ARTESIA

Describe Cause of Problem and Remedial Action Taken.\*

Transfer pump malfunctioned, allowed water tank to overflow. All fluid released was contained within the dike. Vacuum up all fluid possible and dispose of at R360 disposal facility. Repaired transfer pump. Will dig out contaminated soil, dispose of at R360, and replace with clean soil from a nearby source.

Describe Area Affected and Cleanup Action Taken.\*

See above explanation

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
