Describe Cause of Problem and Remedial Action Taken.*

Production separator water dump malfunction allowing water to exit vessel with oil product to the sales oil tank/s which filled, over flowing into our secondary containment area. A small amount ran over to the immediate area next to our secondary containment but stayed within our facility boundary.

Describe Area Affected and Cleanup Action Taken.*

Water dump was fixed and vacuum trucks were immediately brought in to recover all available product back to our oil storage tank/s. Once free liquid is picked up the area will be remediated as per requirements.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
