NATURE OF RELEASE

Type of Release: Produced Liquids	Volume of Release: 10 BBL	Volume Recovered: 10 BBL
Source of Release Tank Overfill	Date and Hour of Occurrence 02/27/2013 07:00 (MST)	Date and Hour of Discovery 02/27/2013 07:00 (MST)
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A facility tank received a large amount of liquids (slug) at the produced water storage tank (T-010) that impacted the earthen containment.

Describe Area Affected and Cleanup Action Taken.*

The impacted soils were collected and staged for disposal.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**RE: Form C-141 Report
Produced Liquids Release at South Carlsbad Station**

Mr. Bratcher:

Pursuant to 29 (19.15.29) NMAC please find enclosed the requisite C-141 Form for the February 24, 2013 release of produced liquids (brine) at our South Carlsbad station. Approximately 10 barrels (420 gallons) of brine impacted the secondary containment of our on-site tank battery when a large amount of produced water was received at the station and caused an over-fill of our permitted Tank T-010. The containment construction consists of an earthen berm and earthen bottom.

If you have any questions or need more information, please contact Jim Heap by phone at 432-686-5404, by email at jkheap@eprod.com or me at 713-318-6684

Yours truly,

Matthew E. Marra
Senior Director, Environmental
