If a Watercourse was Impacted, Describe Fully.\*

#### Describe Cause of Problem and Remedial Action Taken.\*

A D-6 Caterpillar Bulldozer operated by a 3<sup>rd</sup> Party struck a 6-inch steel pipeline, slip-lined with 4-inch poly pipe. The resulting pipeline release did not cause any fire, injury or property damage. The pipeline was shut in, repairs were completed and the pipeline was placed back in service.

#### Describe Area Affected and Cleanup Action Taken.\*

This release was initially deemed non-reportable to the NMOCD. During remediation activities, Southern Union opted to reclassify this release as a reportable release, due to the depth of soil impact. The remediation of this release is in progress and this release will be remediated to NMOCD regulatory standards.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
