Describe Cause of Problem and Remedial Action Taken.* Cause: FLARED 11 MINUTES DUE TO HIGH OXYGEN CONTENT IN THE RESIDUE GAS STREAM. Remedial Action Taken: CONTACTED OXY MEASUREMENT AND PLANT PERSONNEL TO LOCATE THE SOURCE OF OXYGEN. Describe Area Affected and Cleanup Action Taken.* N/A		

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC D rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC D marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC D acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
