Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.

Discovered check valve leak and immediately shut line down. Emergency One-Call made and permanent repair. Valve check replaced. MP96. Source of leak was isolated and the remote site secured.

Describe Area Affected and Cleanup Action Taken.

Majority of crude was contained within tin horn containment. Vacuum trucks immediately mobilized to site and recovered 40 Bbls. Remaining stained soil will be excavated and managed according to OCD required remedial action plans.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
