**Subject:** RE: Final C-141, 2RP-283 (Walt Canyon AMA Federal #4)

Mike,

Yates would also request permission to backfill the two (2) open excavation sites on the well pad.

Thank you.

**Subject:** Final C-141, 2RP-283 (Walt Canyon AMA Federal #4)

Mike,

I have attached the Form C-141 Final Report and supporting documentation for the captioned well. Yates is in process of plugging and abandoning the well/location. I have checked OCD Online for the status of 2RP-283, and it is still open. As I have highlighted on the cover page that the impacted soils that were stockpiled have been removed and was taken to an NMOCD approved facility for disposal. Remaining chlorides left in-place (899 ppm and 23.5 ppm) should not pose a threat to ground water, (DTGW was documented on the C-141 at 493' per the NMOSE), the ChevronTexaco Trend Map shows DTGW at 75'.

Yates would like to request verbal permission to proceed with the P & A process and reclamation of the well pad area. Please contact me if there are any questions.

Thank you.
