If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Tank failure. Tank was by-passed upon discovery. Tank was replaced; berm was repaired.

Describe Area Affected and Cleanup Action Taken.*

Impact was excavated and 60 cubic yards were disposed at Sundance Services, Inc. Bottom composite samples were taken; analysis is attached. At the landowner's direction, topsoil was replaced and will be tilled, fertilized and seeded with owner's seed choice in the early spring. Any hydrocarbons left in place will remediate with natural attenuation. Groundwater appears to be <100' bgs. There are no water wells within 1000' radius. Photos are attached. *An additional 24 cubic yards was excavated from the south impact are. Composite samples were resubmitted and were below OCD guideline. Landowner Jerald Doom of the Doom Ranch gave permission to excavate soils and dispose.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
