NATURE OF RELEASE

Type of Release Produced Water	Volume of Release 200	Volume Recovered 160
Source of Release Punctured water transfer line	Date and Hour of Occurrence February 11, 2014; 1:30pm	Date and Hour of Discovery February 11, 2014; 4:00pm
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Jerry Mathews; Don Mayberry; Amancio Cruz Mike Bratcher-OCD/Jim Amos-BLM	
By Whom? Wes Ryan/Hub Perry	Date and Hour February 11, 2014; 4:15pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

At the Apache 24-3 battery a produced water transfer line was punctured when it was run over by a water truck causing it to spill down the road. Flow back drivers did not report the leak and the pumper had yet to make it to that section of his route for the day. A WIPP employee discovered the spill and contacted assistant foreman Wes Ryan who called the Lease Operator who then he went directly to the site and began to shut in the surrounding wells. When the lease operator realized that it was his transfer pump that was producing the leak he turned that off as well and immediately called for recovery trucks who started with cleanup and had roustabouts come out and repair flow line.

Describe Area Affected and Cleanup Action Taken.*

Spill flowed into a ditch approximately 1/4 mile down the road. Roustabouts were called in to begin cleanup and recovery.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
