Describe Cause of Problem and Remedial Action Taken.\*

A fitting on the 3" water transfer pump failed due to excessive vibration. The pump was shut down, the fittings were replaced and the pump was repaired.

Describe Area Affected and Cleanup Action Taken.\*

The pump was located inside a 0 perm containment around the tanks and pumping equipment, due to the pressure at the release point approximately 17,600 total area of pasture land was impacted by the water being carried east due to high winds. Approximately 10 bbls of fluid was recovered from the containment area. The heavily impacted vegetated area measured approximately 4,000 sq.ft. The spill area will be cleaned up in accordance with the NMOCD and BLM remediation guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
