If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* The well had been shut in for repairs. The casing valve was accidentally left open when the well was put back on production. The valve was restored to a normally closed position.

Describe Area Affected and Cleanup Action Taken.* The release impacted approximately 8,220 sq. of caliche well pad area and misted approximately 3000 sq.ft. of pasture area. All of the free standing fluid was recovered with a vacuum truck. The affected area was remediated as per NMOCD and BLM recommended guidelines. Please reference the attached *Remediation Summary and Site Closure Request* for remediation details.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
