San Juan, NM  
Aztec Pictured Cliffs (71280)  
Blanco Mesaverde (72319)

Dear Sir,

Amoco received approval to downhole commingle this well DHC #1298 on July 17, 1996. On their C-107A Amoco asked that production be allocated by straight percentages. Conoco purchased this well in January, 1998. Conoco recently completed commingling this well and tested each zone independently February 5, 1999. The test results were as follows:

Mesaverde	339 MCFD	15 BO	5 BW
Pictured Cliffs	256 MCFD	0 BO	0 BW

Based on the above test Conoco would like to amend the original allocation percentages listed on the DHC Order # 1298 to the following:

Mesaverde	Gas	57%	Oil	100%
Pictured Cliffs	Gas	43%	Oil	0%

Conoco feels that the amended percentages based on an actual test accurately reflect how the Mesaverde and Pictured Cliffs production should be allocated. If you have any additional questions regarding this request please call me at (915) 686-5798.

Sincerely,

A handwritten signature in cursive script that reads "Kay Maddox".
