Absolutely. I actually should have caught that during the administrative completeness review, so I would not want that to impede progress. And I do understand that the form is not designed for use with a pit, especially a MWFM pit, but it managed to stay included in the rule.

Thanks,

Mike

I see that a C-102, which is obviously built for a well- not a pit, requires a Surveyor's Certification.

This site has not yet been surveyed, as a survey is planned as part of the geotechnical foundation study that precedes construction.

Do you want to approve the permit on the condition that construction does not begin until OCD receives the C-102? That does not hurt the schedule and gets us what we all need.

Randy – I also need a form C-102 for this pit, I don't see one in the permit.
