Describe Cause of Problem and Remedial Action Taken.*

A buried fiberglass line was stuck by the backhoe causing 110bbls of fluids to be released within the excavation. Talon/LPE was on site. The wells were shut in and the line was immediately repaired. A vacuum truck was on site and recovered 95 bbls of fluid.

Describe Area Affected and Cleanup Action Taken.*

Inside the open excavation, measuring approximately 15' long x 4' wide x 3' deep. The impacted soil was excavated. Soil samples will be taken.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
