Date: Tuesday, December 10, 2013 10:05:19 AM

Lara,

My concern would be the background sample. Also, there is an open C-141 (2RP-950) that had been determined to be inside the spill path of 2RP-1189. When you get ready to close out this release, could you please include a C-141 Final for 2RP-950 as well?

Thanks,

Mike Bratcher

Lara,

Thanks for the info. This plan is approved as written. The operator will be liable if the site does not re vegetate.

Thanks

We will be putting soil amendments on the surface of the site, till the soil amendments in and then seed the site.

Our soil amendments is custom mix that we make to add nutrients to the soil to help vegetative growth. It includes: RestoreNhance or BioNhance (depending on the soil), Store bought manure, garden soil/potting soil, peat moss and a 13.13.13 fertilizer. If available, we will use locally grown mildewed hay.

The information for RestoreNhance and BioNhance is attached.

Lara,

What is are you purposing to use on the hydrocarbon contaminated soil to remediate it?
What amendments?

Thanks
