If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

O-Max Hand and Rig Crew were not watching shale shaker or roll off bin resulting in a release of 50 barrels of brine water. A backhoe was dispatched and scraped up the wet soil and put in roll of bin to be disposed.

Describe Area Affected and Cleanup Action Taken.*

The entire release was contained to the pad area. The wet area was scraped and the contaminated soil was placed in a roll off bin for disposal. On 12/2/2013 the area was excavated to 6 inches and confirmation samples of the bottom and sidewalls were sent to a commercial laboratory for analysis for chloride. The excavated soil was disposed of at an NMOCD approved facility.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
