Describe Cause of Problem and Remedial Action Taken.*

Someone had put the valve handle back on the casing valve several days after the pumper had removed it, causing the fluid to be released.

Describe Area Affected and Cleanup Action Taken.*

The standing fluid was recovered immediately and saturated soils were excavated and hauled to Sundance. Contamination will be excavated and hauled to Sundance and we will meet the Guidelines and Regulations of the NMOCD to closure.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
